Table or Desk

# INDOOR CARDBOARD BOOMERANG

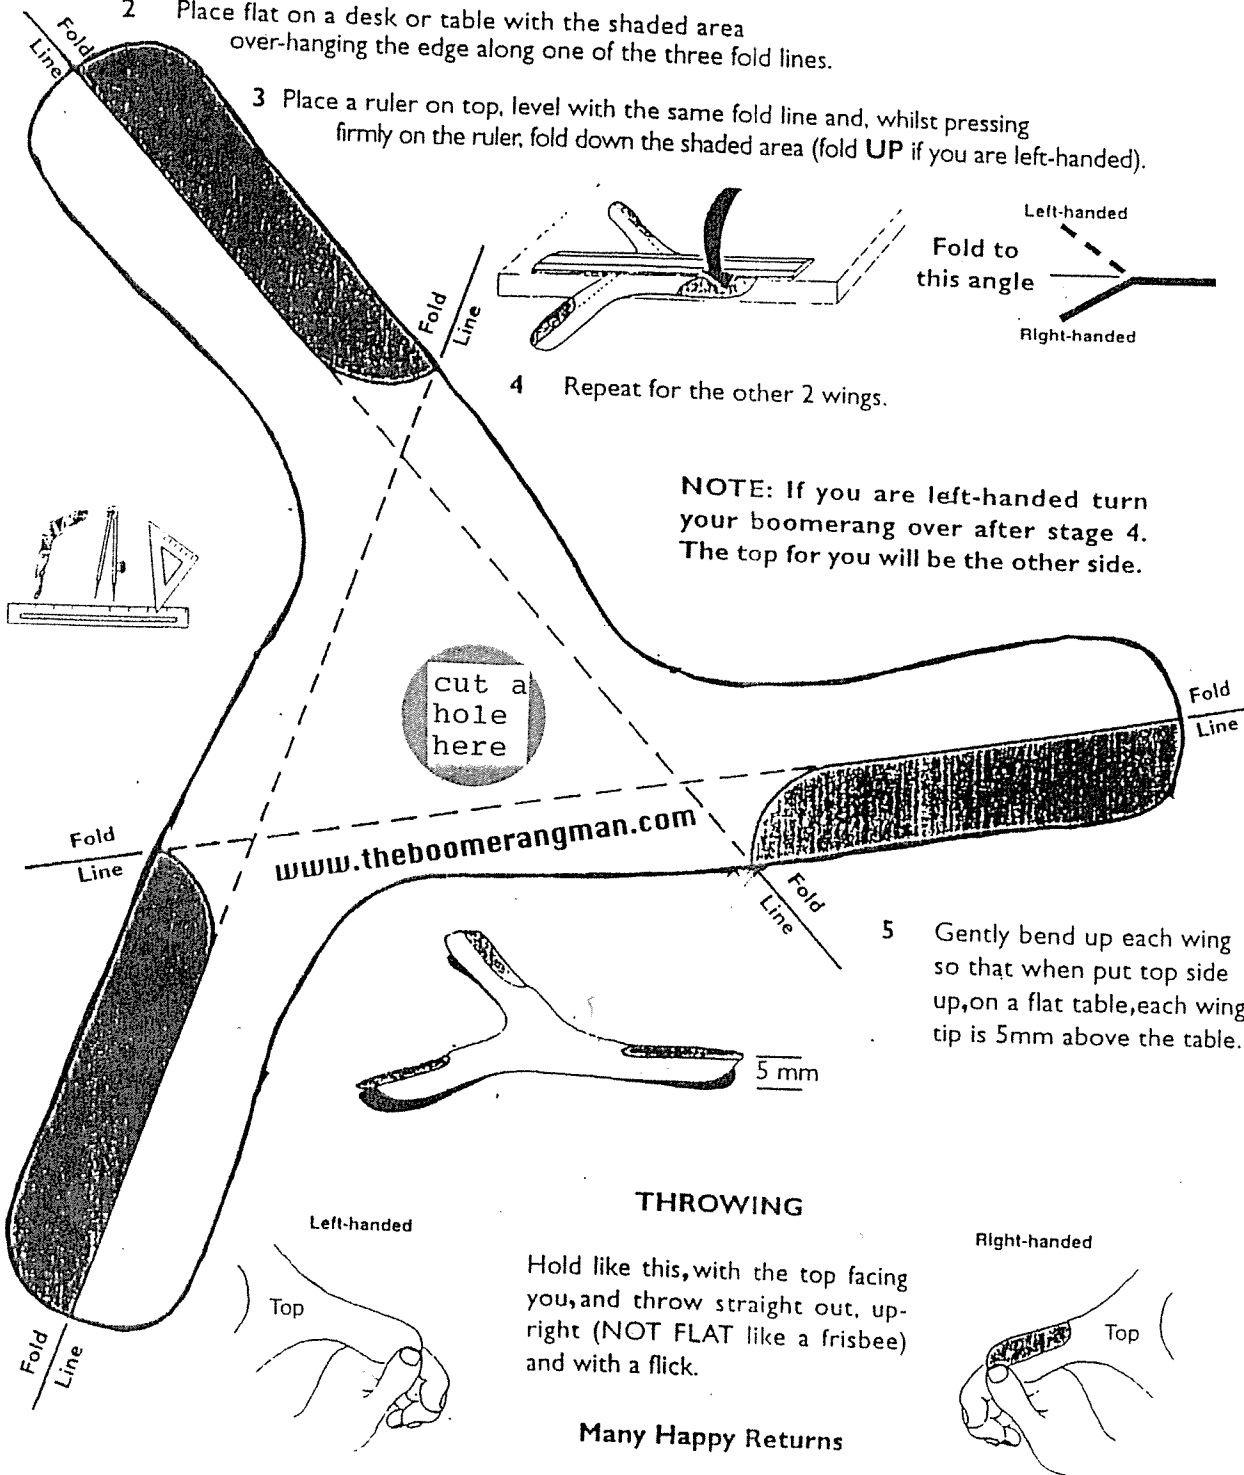

Designed By  
Lawrence West  
Indoor Boomerang World Record Holder

## INSTRUCTIONS

- Carefully cut around the out-line.
- Place flat on a desk or table with the shaded area over-hanging the edge along one of the three fold lines.
- Place a ruler on top, level with the same fold line and, whilst pressing firmly on the ruler, fold down the shaded area (fold UP if you are left-handed).

MAKE FROM PIZZA BOX, POSTER BOARD, OR HEAVIER CARDSTOCK.

- Repeat for the other 2 wings.

NOTE: If you are left-handed turn your boomerang over after stage 4. The top for you will be the other side.

- Gently bend up each wing so that when put top side up, on a flat table, each wing tip is 5mm above the table.

## THROWING

Hold like this, with the top facing you, and throw straight out, upright (NOT FLAT like a frisbee) and with a flick.

Many Happy Returns
